Summary

Computer Engineering student at EPITA (M.Eng. 2028) with a strong C/systems foundation and hands-on backend and LLM-automation experience. Seeking a **4–6 month internship in the United States in 2028**, in software engineering (backend, systems or AI automation) or IT consulting.

Experience

Keyweo Oct 2026 – Jan 2027 (expected)
AI Automation Engineer Intern *Barcelona, Spain*

- Building a lead-qualification CRM from scratch (PHP 8.4, MariaDB), designed mobile-first for intensive field use by the agency's advisors.
- Designed a 0–100 lead-scoring model built to feed conversion data back into Google Ads campaigns.
- Automated WhatsApp (Meta Cloud API) and email follow-ups with configurable rules and delays.
- Set up GitHub CI with mandatory tests before merge and GDPR compliance by design; AI-assisted development with Claude Code backed by documented clean-code conventions.

EPITA Sep 2023 – Jun 2026
Student Ambassador – Communication Staff *Le Kremlin-Bicêtre, France*

- Represented the school at student fairs and open days, helped organize event logistics, and mentored 1st- and 2nd-year students.

Climbing Gym & Restaurant Jul 2024
Front Desk & Floor Staff (summer job) *Massy, France*

- Customer service, sales and table service in a fast-paced environment; stayed effective under peak-hour pressure.

Projects

42sh – POSIX-compliant Unix shell Jan 2026
C99 • team of 4 • EPITA

- Rewrote a POSIX-compliant Unix shell from scratch in C: lexer, recursive-descent parser, AST evaluator, built-ins.
- Git workflow with branches and code reviews; Make builds, Criterion unit tests, leak detection with Valgrind and AddressSanitizer.

Access Dev Lab – Accessible voice-controlled IDE May – Jul 2026
Java 21, Quarkus, PostgreSQL, Docker • team project • EPITA

- Inclusive IDE for developers who cannot use their upper limbs; interviewed developers with motor impairments to ground the design.
- Backend REST API with JWT authentication and owner/admin authorization, file-system service with path-traversal protection, and logging.
- Containerized with Docker; brought the test suites to 135/135 passing before the final defense.

Education

EPITA – School of Engineering and Computer Science 2023 – 2028 (expected)
Master of Engineering (Diplôme d'Ingénieur), Computer Science *Paris, France*

- Upcoming major: Software Engineering & Information Systems (SIGL). Intensive C/Unix bootcamp ("Piscine"): memory, processes, signals, syscalls.
- Coursework: algorithms & data structures, OOP (Java, C++), databases (PostgreSQL), web (JavaScript/TypeScript, React, Node.js), networking, machine learning.

Skills

Languages	C, Java, Python, C++, SQL, JavaScript/TypeScript, PHP, Go, Bash
Backend & Data	Quarkus, REST APIs, JWT, PostgreSQL, MariaDB, Node.js, React
Tools & Testing	Linux, Git, GitHub Actions, Docker, Make, GDB, Valgrind, ASan, Criterion, JUnit, Jest
AI	LLM-assisted development (Claude Code), workflow automation, API integrations
Soft skills	Public speaking, customer advice, mentoring, teamwork under pressure; Agile sprints, SMART goals
Spoken	French (native), English (professional working proficiency, B2/C1)
Interests	Handball, swimming, climbing, skiing; dance, circus, theater
